

DUG Eagle Ford Conference and Exhibition 2011 Show Report

The Eagle Ford shale in South Texas is rapidly being hailed as “the perfect play,” boasting some of the best returns for producers, nearly 4,000 attendees learned at Hart Energy’s second annual DUG Eagle Ford Conference and Exhibition. The event was held in San Antonio Oct. 11-12. Midstream and technical workshops preceded the main day. Nearly 200 rigs are currently turning to the right in the play, with many more to come. Eagle Ford production is approaching 125,000 barrels of oil equivalent per day. It has gross potential of 25 billion barrels of oil equivalent, or 150 trillion cubic feet of gas.

“This is a million-barrel-a-day oil field,” Marathon Oil chief operating officer Dave Roberts said.

Executives from BHP Billiton-Petrohawk Energy, Pioneer Natural Resources and Marathon Oil, among others, said they will be adding more rigs. The latter will have 10 by year-end and add a rig per month in 2012. “We’re planning to spend \$1- to \$1.5 billion a year in the Eagle Ford as far as the eye can see. Frankly, it’s that good,” Roberts said.

“This has probably the best economics in the Lower 48,” said Dick Stoneburner, chief operating officer of BHP Billion-Petrohawk. The play is changing the economics of South Texas as activity continues to ramp up. This fall, some \$1.1 billion will be added to the Texas Rainy Day Fund thanks to rising income from the booming Eagle Ford, Texas Railroad Commission chair Elizabeth Ames Jones told attendees.

Midstream constraints seem to be the main challenge for producers who are seeking an outlet for rising production. There are several billion dollars of new infrastructure planned in this play over the next 24 months. Attendees learned which companies are planning gathering, processing or pipeline additions and how much take-away capacity will be available.

Several speakers mentioned the need to bring down well costs as an additional challenge, and of course, all were sensitive to the ongoing need to work more closely with landowners and local authorities. *“The biggest thing that could derail this thing is a lack of communication,” said one.*

Georgia	Mississippi	South Carolina	

DUG Eagle Ford 2012 – Save the Date

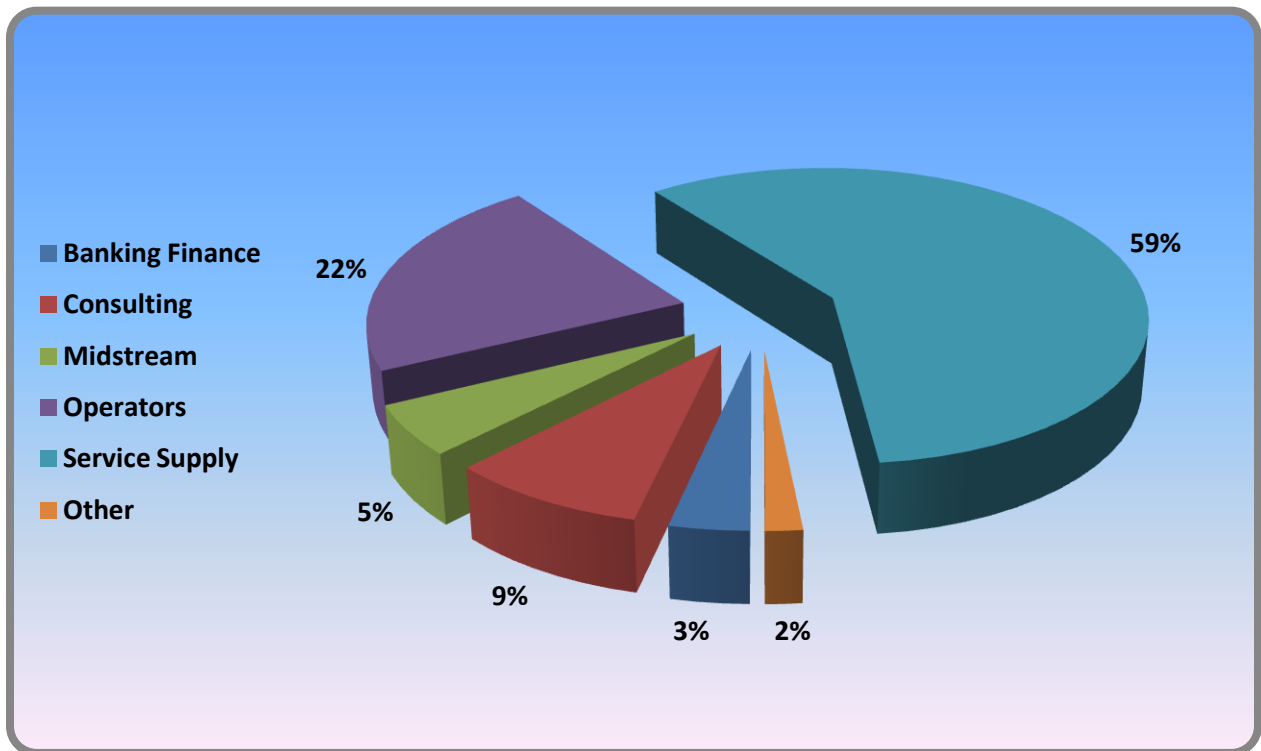

The Eagle Ford shale is rapidly moving into the top tier of U.S. shale plays, propelled by excellent well results across its dry gas, rich gas and oil-prone areas. Now, the Pearsall shale play is also growing in south Texas. Some Eagle Ford operators are spreading out to include drilling in the Olmos and Escondido, and the Austin Chalk. The 2012 DUG Eagle Ford Conference & Exhibition will focus on the expanding Pearsall shale play and delve into both the sandstone and chalk development.

On behalf of Hart Energy, we thank all those who have participated in **DUG Eagle Ford** the past two years and we invite you back next year! Mark your calendars for the **3rd DUG Eagle Ford Conference & Exhibition**. The 2012 dates are **October 14 – 16, 2012**, at the Henry B. Gonzalez Conference Center in San Antonio.
